e-mail: sales@silentaire.com

Special Features:

- you can use 9 different colors simultaneously
- easy handling; manual changing of colors with a Color-Dial at your fingertips
- contains a Pressure Regulator (0-28 PSI) to pressurize the paint; this gives you the possibility of innumerable special effects (squirt, spatter and spray as never before!)
- blend of colors; two colors of adjacent color bottles can be blended however you like
- quick change of color (cleaning of your airbrush with its color cup is not necessary)
- simple connection to your compressor with a 6mm Air Hose and a Quick Connector
- application does not depend on direction; you can use the SPECTRUM 2000 in a horizontal position, as well as in a vertical position
- simple backflushing of colors once you decide to change the colors; with this feature you have no loss of paint
- all the components are accepted by the FDA (Food and Drug Administration) for applications in the field of any kind of edibles
- the SPECTRUM 2000 can be connected to bottomfeed airbrushes as well as to sidefeed airbrushes, with a special adapter (accessory), distributed through:
SILENTAIRE TECHNOLOGY
- it can only be used on backsealed airbrushes (it's a pressure system!); consult your airbrush store about the compatibility of the different airbrushes
- simple transport and connection to different sources of compressed air is possible
